

ITAI 1371 Introduction to Machine Learning

Professor Viswanatha Rao (Vishwa)

Assignment: Lab 06 Exploratory Data Analysis

Group Member Contributions

Monepha Mitchell

Ved Dalwadi

For module 7, I ran the code on the confusion matrix and classification report to understand the output of precision and recall scores for predicting titanic survival. I took these 2 terms and turned them into real world examples to help me and my teammates better understand each of the concepts. For precision, I used self driving cars and airport security; for recall, these examples helped break down the terms given to us. I also reviewed the cross validation method to help me understand why this is better than just a train test split

Nigel Bontif,
