

ITAI 1371 Introduction to Machine Learning

Professor Viswanatha Rao (Vishwa)

Assignment: Lab 09 Exploratory Data Analysis

Group Member Contributions

Monepha Mitchell

My contribution to the group included helping complete and review the Decision Tree and Random Forest sections of the lab. I helped make sure the models were trained using the correct training data and evaluated using the test data. I also compared the accuracy results and explained that both models achieved 100% accuracy in this activity. In addition, I helped interpret the feature importance results, which showed that petal width and petal length were the most useful features for classifying the Iris flowers.

Ved Dalwadi

In lab 9 I contributed by working on and completing the notebook for this module. I also helped group members understand the correct arguments to put inside the code so the output doesn't give an error and shows 100% accuracy. I also organized the github to merge files together for this project, and asked teammates questions when I did not understand something.
